

Salesforce Delivery Partner · India

Your Salesforce delivery engine, built in India.

A Salesforce-only consulting partner — 28 certified engineers, architect-led delivery, and shifts that cover your evening. Built for firms that need to scale capacity without giving up quality.

01 · Who we are

A focused Salesforce firm.

Headquartered in Jaipur, India. Salesforce-only since day one. Built for partners and end clients who need senior, certified delivery — without the overhead of a generalist offshore shop.

The firm at a glance

Saasverse is a Salesforce-focused consulting firm with a **28-strong development team** backed by dedicated delivery, QA, and project-coordination functions. We work **exclusively on the Salesforce platform** — deep specialist focus, not a generalist offshore approach.

01

Specialist focus

Salesforce only. Every engineer, admin, and architect on staff lives on the platform full-time.

02

Full-stack capability

From entry-level admins to Certified Technical Architects — staffed across every layer of a Salesforce program.

03

Partner-grade rates

Certified resources at market-leading rates — engineered for partners who need margin without compromising quality.

Our promise

We don't show up as another offshore vendor. We show up as **the part of your delivery team that walks the extra mile** — on quality, on timing, on price.

02 · By the numbers

Credibility you can staff against.

A snapshot of the bench you're partnering with — not a generic offshore pool, a curated Salesforce-only team.

Team

28

Salesforce engineers

Plus dedicated delivery, QA, and project-coordination functions.

Certifications

70+

Active Salesforce certifications

Spanning Admin, Developer, Consultant, and Architect tracks.

Focus

100%

Salesforce-only

No generalist dilution — every billable hour lives on the platform.

Coverage

3 zones

UK · US · APAC overlap

Shift structures aligned to your working day — not ours.

03 · Certifications & Cloud Specializations

Certified end-to-end. Across every cloud you need.

Certifications held

From admin to architect

70+ active Salesforce certifications across our 28-engineer team.

Salesforce Certified Administrators

Core admin, advanced admin, business analyst tracks

Platform Developer I & II

Apex, LWC, integration patterns

Sales Cloud / Service Cloud Consultants

Functional design and implementation leads

Certified Technical & Application Architects

Architecture review, scalability, security

Clouds we deliver

Core, specialized, AI-native

Core

Sales Cloud · Service Cloud · Experience Cloud · Revenue Cloud · CPQ

Specialized

Education Cloud

Innovation

Data Cloud · Agentforce / AI on Salesforce · Einstein Cloud

Integration

MuleSoft · API-led Integrations

04 · Time-zone overlap

We cover your evening — so mornings start with progress.

We operate from India Standard Time (GMT +5:30) and structure shifts around your working day — not ours.

Region 01

UK & EU

GMT · CET

Same-day turnaround.

Work briefed by your evening is ready by your next morning — your team starts the day with progress, not a queue.

Region 02

US East

EST · EDT

3–4 hour live overlap.

Live afternoon overlap each day for stand-ups, demos, and reviews — real conversations, not async ping-pong.

Region 03

APAC & ME

AEST · GST

Near-full working overlap.

Effectively a co-located team — your engineers and ours are online together for most of the working day.

05 · How we engage

Three engagement models. Pick the shape that fits.

You bring the scope; we bring the capacity. Each model is built for a different point on the build-vs-buy curve — and we'll tell you honestly which one fits your situation.

01

Model 01

Staff Augmentation

Certified developers and admins **embedded directly into your team**, billed monthly. Your tools, your rituals, our people.

Best for

Scaling capacity on existing programs

02

Model 02

Fixed-Scope Delivery

A **defined implementation delivered to a milestone plan** at a fixed price. You get certainty on dates, scope, and cost.

Best for

Net-new implementations & well-scoped builds

03

Model 03

Managed Support

Ongoing **post-go-live org support and enhancements** with strict SLAs — the platform stays healthy without taking up your bandwidth.

Best for

Live orgs needing predictable BAU coverage

06 · How we deliver

A six-stage delivery method. No surprises.

Every engagement runs on the same backbone — adapted to scope and pace, but always architect-reviewed and QA-gated before anything reaches your org.

The thread through every stage Architect oversight on design · Senior reviewer on every PR · QA gate before deploy · Daily written status in your channel.

Predictable monthly coverage. SLA-backed.

Three tiers built around real partner workloads — pick the band that matches your org's volume, scale up or down without contract gymnastics.

Tier 01 Basic \$1,200 / month Support hours 40 hrs/ mo Standard SLA 8 businesshrs Critical SLA 24 hours Channels Email · Phone	Tier 02 Most popular Growth \$2,560 / month Support hours 80 hrs/ mo Standard SLA 4 businesshrs Critical SLA 8 hours Channels Email · Phone · Slack	Tier 03 Enterprise Premium \$4,800 / month Support hours 160 hrs/ mo Standard SLA 2 businesshrs Critical SLA 4 hours Channels Dedicated Manager

08 · Partnership models

Built to sit behind your brand.

Most of our partners are consulting firms, ISVs, and Salesforce SI partners outside India. Here's how we plug into your delivery model — and how you grow without scaling overhead.

Model A

White-Label Delivery

Our engineers work under **your brand, your email, your client comms**. You stay in front; we run the build behind the curtain.

- Partner NDA & sub-contract framework
- Your tooling, repos, project boards
- Partner-only rate card with margin built in

Model B

Co-Delivery Partnership

Joint delivery on shared accounts — **your architect leads, our team builds**. Both names on the SOW where it makes sense.

- Shared backlog and ceremonies
- Quarterly capacity commitments
- Defined escalation & QA contract

Model C

Dedicated Pod / ODC

A ring-fenced pod of certified engineers **working exclusively for you** — your bench, run by us. Predictable monthly cost.

- 3–10+ engineers, scoped by role
- Quarterly hiring & ramp plan
- Dedicated delivery lead included

09 · Sample engagement

Agentforce AI service agent — live in 6 weeks.

We built an Agentforce service agent that **deflected 65% of inbound tickets** and cut first-response time from **4 hours to 2 minutes**— on the client's existing Salesforce org.

Client

Algo Works · Software services

A software services company operating on Salesforce. Support and pre-sales teams were drowning in repetitive Tier-1 questions.

The challenge

High volume of repetitive Tier-1 questions answered manually by senior staff

Inconsistent answers and slow first response during peak periods

Knowledge spread across Salesforce Knowledge, docs, and tribal memory

Automation had to stay inside Salesforce and respect existing security

What SaaSverse built

Production Agentforce agent, grounded in the client's own org

Agent

Tier-1 chat handler with controlled escalation to humans

Topics

Product FAQs · case status · routing — each with explicit guardrails

Grounding

Retrieval grounded in approved Salesforce Knowledge articles

Actions

Custom Apex / Flow for secure record lookups & case routing

Guardrails

Permission-set scoped access, PII handling, human-handoff with context

Outcomes

Live on the existing org. Real numbers.

Tier-1 deflection

65%

First-response time

~4 hrs → ~2 min

Answer consistency

Single source grounded in approved Knowledge

Time to deploy

6 weeks

10 · Why partners choose SaaSverse

Not just another vendor. A delivery partner that earns the seat.

01

Specialist focus

Salesforce-only.
No dilution.

Every engineer, admin, and architect lives on the platform full-time. We don't take side gigs on stacks we don't know — and we don't pretend to.

02

Cost efficiency

Certified resources.
Market-leading rates.

Engineered for partners who need real margin on resold delivery — without the quality drop-off that usually shows up at this price point.

03

Time-zone alignment

Shifts built
around your day.

Same-day for UK/EU, 3–4 hour live overlap for US East, near full overlap for APAC and the Middle East. Seamless collaboration, not async firefighting.

The extra mile

We don't show up to bill hours. We show up so your client renews — and so your reputation grows in the markets we deliver into.

Next step

Let's build together.

Send us a brief, a JD, or a half-formed idea. We'll respond with a shortlist of named engineers, indicative timelines, and a rate card — within two business days.
